

Project Page Build

OVERVIEW

Our project page build service helps you get your digital engagement project up and running faster. This service provides full project page setup including tool activation, populating content, managing images and setting up your project settings.

When you access this service you can have confidence that your page will be built and delivered within 24hrs of receiving your approved content. We will also work with you to make iterations and changes to your project.

Our team has helped deliver thousands of online engagement projects so you can have confidence that your project creation is in good hands.

WHO'S IT FOR?

We highly recommend this service for clients who need extra support building a project page or those who would simply like us to look after it for you. This service works perfectly in conjunction with our EngagementIQ Project Planning Sessions.

HOW IT WORKS

Use our project page build template to provide us with approved copy and we'll setup your project page including tools and information widgets. We'll then work with you on iterations and testing to ensure your EngagementHQ project page is ready for launch.

COST

- POA
